Weight: 35g.

## Features

The tight General purpose pouch to store small items in.

The pouch is designed to be as light weight and take as little space as possible, while remaining strong enough for military use.

Elastic band, on the pouch to keep the contents secured, even when the flap is open.

Pull tab on the flap to make it easy to open, even with gloves on.

The flap can be pushed into the pouch and secured with Velcro for easier access to the thing you carry in the pouch.

Bottom drain hole.

Velcro closed flap with pull tab, for easy opening

Fold back attachment system makes it possible to attach the pouch on any equipment vest or belt.

It has Velcro open able bands on the back so it can be carried horizontally on the trousers belt. To carry it vertically you use the silent and easy to use fold back system on the back of the pouch. This system makes it possible to attach the pouch without removing other pouches from the belt.

Fits inside: Pistol magazine, multi tool, flash light or other similar items.

The attachment systems is easy to use both on standard 25 mm MOLLE systems as well as on the Swedish 20 mm system or on 50 or 60 mm belts

A multi tool fits inside the pouch with the flap open or closed.

The flap has a pull tab to be easy to open.

You can carry a pistol magazine in the pouch with the flap open as in the picture or closed.

The flap has a pull tab to be easy to open.

You can carry a Tourniquet CAT in the pouch with the flap open as in the picture or closed.

# Equipment carried in GP pouches

# Carrying GP pouches

The pouches have a vertical attachment system with the fold back band. They also have a horizontal attachment system with Velcro bands.

A GP pouch attached vertical on an equipment vest.

A GP pouch attached horizontally on an equipment vest.

The pouches have a vertical attachment system with the fold back band. This makes it possible to attach the pouches at different heights. This pouch is attached low.

A GP pouch attached high on an equipment belt.

The Velcro attachment bands on the back can be attached around an adjustment band on a chest rig or similar. This GP pouch is attached vertical and upside down.

This GP pouch is attached vertical with the flap up.

A GP pouch attached vertically and high on a Riggers belt.

A GP pouch attached horizontally on a Riggers belt.

# Attaching GP pouches vertically on MOLLE platforms

Our pouches are compatible with both standard 25 mm MOLLE (Olive webbing on the picture) and 20 mm Swedish Molle (Grey webbing on the picture).

Place the pouch in the position you want it. Push the attachment band on the pouch through the MOLLE band on the carrier.

Push the attachment band on the pouch under the first 25 mm band on the back of the pouch.

Push the attachment band on the pouch through the next MOLLE band on the carrier.

Push the attachment band on the pouch under the next 25 mm band on the back of the pouch.

When you have reached the bottom of the pouch, make sure to go UNDER the blue band. Fold the attachment band and go into the tunnel on the pouch

**But you MUST ALWAYS go under the blue band.**

On this pouch we also went under the 25 mm wide olive band.

Pull the pouch to make sure it is securely attached.

This is what it should look like when it is ready.

# Attaching GP pouches horizontally on platforms

The pouches have Velcro bands on the back.

Place the pouch in the position you want it.  
Push the loop Velcro bands on the pouch through the MOLLE band on the carrier.

Pull the loop Velcro bands out and push the Hook Velcro bands onto the loop. Make sure the areas match.

Pull the pouch to check that the loop and hook have joined.

Repeat the process with the other band so the pouch is securely attached to the band on the carrier.

Now pull the pouch to make sure it is securely attached.

To attach the GP pouch on a belt, open the Velcro bands on the pouch and place the pouch on the outside of the belt.

Pull the Velcro bands tight and close the Velcro bands.

Pull it to make sure it is securely attached..
